

Elkhorn Commodity Rotation Strategy ETF (DWAC)

EXCHANGE-TRADED FUND

The first Dorsey Wright commodity exchange-traded fund. No K-1.

The Elkhorn Commodity Rotation Strategy ETF is a momentum-based, actively-managed ETF that uses Dorsey Wright & Associates' proprietary Relative Strength methodology to select the top five commodities from a universe of 21 commodities and adds a mix of short duration, highly liquid, high quality bonds. The portfolio is designed to be a tactical, momentum-based commodity strategy with a modified dynamic roll methodology.

| Performance | YTD | 1 YR | 3 YR | 5 YR | 10 YR | INCEPTION |
|--|-------|-------|------|------|-------|-----------|
| Fund NAV | 4.82% | 4.82% | — | — | — | 2.60% |
| Fund Share Price | 4.74% | 4.74% | — | — | — | 2.35% |
| Elkhorn Dorsey Wright Commodity Rotation Index | 6.29% | 6.29% | — | — | — | 4.59% |
| S&P GSCI Index | 5.77% | 5.77% | — | — | — | 12.68% |

As of 12/29/2017. Share price returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Performance data quoted represents past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than performance data quoted. Returns less than one year are cumulative. Call 630.384.8700 for current month-end performance.

Elkhorn Commodity Rotation Strategy ETF (DWAC)

EXCHANGE-TRADED FUND

IMPORTANT RISK INFORMATION

There are risks involved with investing in ETFs, including possible loss of money. The fund is actively managed. Shares are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. There can be no assurance that the fund's investment objective will be achieved.

Because the fund is non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund. The fund may invest in commodity futures contracts traded on non-U.S. exchanges or enter into over-the-counter derivative contracts with non-U.S. counterparties. The fund is subject to counterparty risk, options risk, pooled investment vehicle risk, swaps risk and more. Return / Risk is the relationship between the amount of return gained on an investment and the amount of risk undertaken in that investment. SEC 30 day yield is a standard yield calculation developed by the Securities and Exchange Commission that allows for a common ground comparison of yield performance. It is based on the most recent 30-day period. It is calculated by dividing the net investment income (less expenses) per share over a 30-day period by the current maximum offering price.

The fund seeks to provide investors with total return.

Volatility is the annualized standard deviation of the index returns.

S&P and Moody's study the financial condition of an entity to ascertain its creditworthiness. The credit ratings reflect the rating agency's opinion of the holdings financial condition and histories. For information on the rating agencies methodology, visit <http://www.standardandpoors.com> or <https://www.moodys.com>.

The S&P GSCI Index comprises the principal physical commodities of active, liquid futures markets and is recognized as a leading measure of general price movements and inflation in the world economy. S&P® is a registered trademark of Standard & Poor's Financial Services LLC (S&P). One cannot invest directly in an index.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Market returns are based upon the midpoint of the bid/ask spread at 4:00pm eastern time (when NAV is normally determined for most ETFs), and do not represent the returns you would receive if you traded shares at other times.

Shares are not individually redeemable and owners of the shares may acquire those shares from the Fund and tender those shares for redemption to the Fund in Creation Units only, typically consisting of 50,000 Shares.

An investor should consider the investment objectives, risks, charges and expenses of the Fund carefully before investing. To obtain a prospectus containing this and other information, please call 630.384.8700. Read the prospectus carefully before you invest.
