

# Elkhorn Fundamental Commodity Strategy ETF (RCOM)

EXCHANGE-TRADED FUND

## The first RAFI commodity exchange-traded fund. No K-1.

The Elkhorn Fundamental Commodity Strategy ETF is an actively-managed exchange-traded fund that seeks to provide total return which exceeds that of the Dow Jones RAFI® Commodity Index through the active management of a short duration portfolio of highly liquid, high quality bonds. The Dow Jones RAFI Commodity Index offers an alternative beta strategy that uses price momentum and roll yield to generate alpha. The portfolio is designed to be a fundamental factor-weighted, broad-market commodity strategy with a modified dynamic roll methodology.

Performance	YTD	1 YR	3 YR	5 YR	10 YR	INCEPTION
Fund NAV	11.01%	11.13%	—	—	—	9.48%
Fund Share Price	11.23%	11.07%	—	—	—	9.56%
Dow Jones RAFI Commodity Index	11.97%	12.09%	—	—	—	10.79%
Bloomberg Commodity Index	1.70%	1.53%	—	—	—	4.46%

As of 12/29/2017. Share price returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Performance data quoted represents past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than performance data quoted. Returns less than one year are cumulative. Call 630.384.8700 for current month-end performance.

## IMPORTANT RISK INFORMATION

There are risks involved with investing in ETFs, including possible loss of money. The fund is actively managed. Shares are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. There can be no assurance that the fund's investment objective will be achieved.

Because the fund is non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund. The fund may invest in commodity futures contracts traded on non-U.S. exchanges or enter into over-the-counter derivative contracts with non-U.S. counterparties. The fund is subject to counterparty risk, options risk, pooled investment vehicle risk, swaps risk and more.

The fund seeks to provide investors with total return.

Volatility is the annualized standard deviation of the index returns. Alpha is a measure of performance on a risk-adjusted basis. Beta is a measure of volatility. Price momentum is the rate of acceleration of a security's price. Dynamic roll methodology is a strategy that utilizes a more flexible monthly futures contract rolling strategy, to determine the new futures contract months for the underlying commodities. Roll yield is the amount of return generated in by rolling a short-term contract into a longer-term contract. SEC 30 day yield is a standard yield calculation developed by the Securities and Exchange Commission that allows for a common ground comparison of yield performance. It is based on the most recent 30-day period. It is calculated by dividing the net investment income (less expenses) per share over a 30-day period by the current maximum offering price.

The Bloomberg Commodity Index is a broadly diversified index that allows investors to track commodity futures through a single, simple measure. One cannot invest directly in an index.

S&P and Moody's study the financial condition of an entity to ascertain its creditworthiness. The credit ratings reflect the rating agency's opinion of the holdings financial condition and histories. For information on the rating agencies methodology, visit <http://www.standardandpoors.com> or <https://www.moodys.com>.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Market returns are based upon the midpoint of the bid/ask spread at 4:00pm eastern time (when NAV is normally determined for most ETFs), and do not represent the returns you would receive if you traded shares at other times.

Shares are not individually redeemable and owners of the shares may acquire those shares from the Fund and tender those shares for redemption to the Fund in Creation Units only, typically consisting of 50,000 Shares.

**An investor should consider the investment objectives, risks, charges and expenses of the Fund carefully before investing. To obtain a prospectus containing this and other information, please call 630.384.8700. Read the prospectus carefully before you invest.**
